Features & Benefits to

PowerPort™ *isp* Titanium device:

- Cosmetically appealing with compact size
- Lighter Weight for Patient Comfort
- Radiopaque
- Easily Identified
- Feel the "click" when accessing

PowerLoc™ Safety Infusion Set

The PowerLoc™ safety infusion set is the ideal device for accessing the PowerPort™ device. This power-combo enables contrast agents to be power-injected. As a result, tissues show up more clearly in CECT scans, making it easier to monitor patient condition. A variety of PowerLoc™ safety infusion set options are also available as accessory kits for continued PowerPort™ device access needs.

Features & Benefits :

Easy to Use :

- Ergonomic wing design provides controlled access and site visibility
- Safety mechanism that you can hear, see, or feel engage
- Dual port adaptability

Comfortable for the patient :

- Small foot print
- DEHP and latex-free
- Easy to dress
- Ultra Low Profile
- Lower insertion and penetration force than other port access needles

PowerLoc™ Safety Infusion Set with Y-Site
